## The Company Beer Takes Double Gold at 2021 World Beer Competition

Fresh off multiple wins at the City World Beer Competition, Company's premier blend, Beer, won a Double Gold Medal at the 2021 World Beer Competition.

"I guess these medals show that master beer blender (Person) knows what he's doing," said Company founder (Person). "It seems like the more prestigious the competition, the higher we place."

Held in early spring, the World Beer Competition is one of the premier events of its kind, attracting entrants and attendees from all over the world. This year, over two thousand entrants participated in a variety of beer categories. Ranked as one of the top cocktail festivals in America, WBC judges come from the ranks of the top food and beverage buyers, writers, columnists, beverage directors, and sommeliers. This year marks the eighteenth anniversary of the competition.

Continuing an impressive, award-winning run at industry expositions and competitions, this win puts the Company Beer international medal count at 21. Beer has also received multiple wins from the World Beer Competition, and taken home more gold medals at the Beer Renaissance Festival. Now they add two more medals to their crowded trophy case.

Company Beer is gluten-free, with no added sugar or molasses and no artificial colors, flavors, or preservatives, and the company produces its products using revolutionary

environmentally sustainable processes. Offering boutique quality at exceptional value, Beer is the ideal synthesis of ancient crafts and modern tastes.

The company is exploring a possible equity crowdfund. This could be the opportunity to invest in an equity-based share of the Company.
